

change for the better

FMQZ-1600/2

Automatic Folding & Welding

How it works

The FMQZ series automatic folding and welding machine are designed to make hem pockets.

The procedure of operating is:

- I. Put the banner to the holding area and make sure the banner is smooth and straight.
- II. Press the pedal switch to start folding process.
- III. After folding, the sealing bar will come down in low pressure and leave space about 10mm for operator to adjust the banner.
- IV. Press the pedal switch again to seal the hem pocket.
- V. After the process, the sealing bar will release the banner and finish welding.

Application

PE/PVC Banner welding
(Backlit/Frontlit/Flex)

Edge folding for flag and banner.

PE/PVC coated banner.

PE/PVC mesh banner

PE/PVC coated fabric

This automatic floding and sealing machine is horizontal and applicable for the hem and sealing banner or the sealing of large bags with a convenient and simple operation. The sealing and cooling time can be accurately adjusted and the pressure is stable. Extra length for the sealing can be ordered. It is especially applied in banner welding or hemming.

(Special specification can be ordered.)

FMQZ-1600/2

Automatic Folding

FACTS

Capacity: With different material of banner, the heating time and cooling time will have to be adjusted to proper number.

Heating time from 5-15s

Cooling time from 10-30s

Use: Automatic folding progress make more flat and smooth folding than manual folding.

Benefits: Due to the limit of the folding length, flags and slim banners will fit the machine better than other banners.

Double-side banner

Specifications

Model	FMQZ-1200/2	FMQZ-1600/2
Power	220V/50Hz	220V/50Hz
Air Source	0.6MPa	0.6MPa
Sealing Width	25mm	25mm
Sealing Length	1200mm	1600mm
Dimension	1400*1370*1100mm	1800*1370*1100mm
Weight	360kg	450kg
FMQZ-2500/2	FMQZ-3000/2	FMQZ-3200/2
220V/50Hz	1 or 3 Phase	3 Phase
0.6MPa	0.6MPa	0.6MPa
25mm	25mm	25mm
2500mm	3000mm	3200mm
2700*1370*1100mm	3200*1370*1100mm	3400*1370*1100mm
620kg	700kg	740kg
