

DZ(Q)-600LG Cabinet Vacuum Packaging Machine

This machine is a special vacuum packaging machine for powder products, specially designed and manufactured for packaging of powder and three-dimensional packaging.

The machine adopts vertical pneumatic sealing, super large vacuum chamber, and open-type transparent vacuum cover. The vacuum chamber is made of stainless steel, suitable for chemical, food, electronics, medicine and other industries.

Machine Model	DZ(Q)-600LG
Voltage (V/HZ)	380/50
Power (Kw)	2
Sealing Length (mm)	600
Sealing Width (mm)	10
Maximum Vacuum (Mpa)	≤-0.1
Chamber Effective Size (mm)	600×300×800
Dimensions(mm)	1200×800×1380
Weight (kg)	250

Feature

1. The unique structure design can vacuum (inflate) packaging of ultra-fine powder, granule, liquid and slurry.
2. The barrels for shaping the products can also be placed in the vacuum chamber.
3. Using PLC control system, a variety of special functions can be used flexibly.
4. The vacuum chamber is made of 304 stainless steel, and the shell material is available in spray paint, suitable for various occasions and material packaging.

5. With a high-strength plesiglass chamber door, all the packaging process is transparent and trackable.
6. The vacuum degree is high and can be adjusted easily by a vacuum gauge.
7. The control system adopts PLC control, and the vacuum delay, heating time and cooling time can be accurately controlled.
8. Special specifications can be customized.
