

DZ-900

Larger Chamber Vacuum Packaging Machine

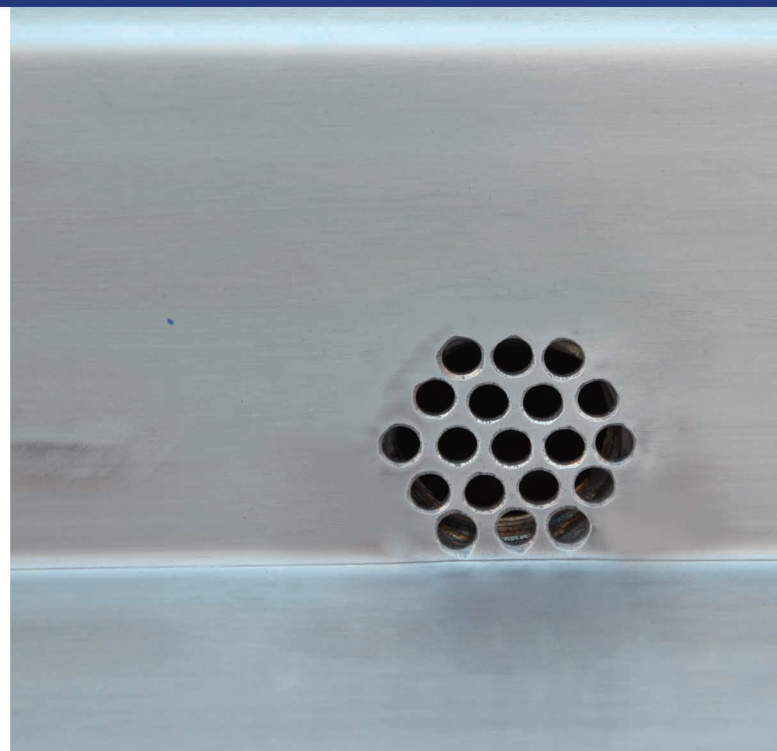

It's one of the most popular vacuum packers. The machine adopts a stainless steel vacuum chamber and a transparent high-strength plexiglass cover. The whole machine is beautiful and practical, and easy to operate. It is suitable for vacuum packaging of oversized and overlong items in the electronics, chemical, food, marine fishery and other industries.

Feature

1. It's of premium design, complete functions, stable and reliable performance, wide application range and good sealing strength.
2. Vacuum pumping and sealing are completed at one time, the vacuum degree is precisely controlled by the PLC touch screen, and the vacuum time, sealing time, and cooling time are precisely adjustable.
3. Large vacuum chamber design, can place products that cannot be packed by ordinary small vacuum packaging machine, such as Jinhua ham, big herring and other super long and large products.
4. The whole machine is made of 304 food grade stainless steel, which is easy to clean and corrosion resistant.

SPECIFICATIONS

Machine Model	DZ-900
Voltage (V/HZ)	380/50
Power (Kw)	2
Packing Speed (times/min)	2-3
Dimensions (mm)	1130×660×850
Chamber Effective Size (mm)	900×500×100
Weight (kg)	150
Sealing Length (mm)	500×2
Sealing Width (mm)	10
Maximum Vacuum (-0.1Mpa)	≤-0.1
